

Body-Piercing-Jewellery

Description:

At Body-Piercing-Jewellery.com, we take pride in providing you with the best and safest products at the best prices available in the body jewellery market, today... and tomorrow!At Europierce Worldwide Ltd, we believe in an ethical approach to piercing - safety first, comfort and problem-free piercings a must.. That is what drove us in creating a new range with a new material, a material that would be flexible as our body, safe hence highly bio-compatible, steam sterilisable so it could be used for fresh piercing, and adjustable to the right length for the piercing, which we find very important too. After more than a year of development researches and trials on different materials, BioFlex was born with the basic BioFlex labret.
